

Mia End Table

Combining contemporary style with practicality, the Mia end tables effortlessly tuck into each other or can be split across separate rooms to create a unifying aesthetic throughout the home. They are crafted from beautifully polished authentic Carrara marble and are available in black, white, or green. Standing on sleek angled legs, each table is framed by either silver, gold or rose gold stainless steel with an elegant finish. Featuring a compact size and space-saving design, they look great as a trio of living room end tables but are also available to be bought separately.
